I mnogo je još toga što ovdje vrijedi vidjeti... Iz antičkih su vremena vidljivi ostaci Donjih gradskih vrata, najvećeg rimskoga hrama na istočnoj obali Jadrana, mozaika iz 2. st. kao i ostaci stambenih jedinica u središtu grada. Po ostacima zidina s istočne strane naslućuje se značaj srednjovjekovnoga Nina. U blizini je

Nin se nalazi usred jedinstvene plitke lagune, a njegova je starogradska jezgra na malom otočiću promjera 500 metara. Svega je 14 kilometara udaljen od Zadra. Njegove su pješčane plaže nezaboravne te su s razlogom uvrštene u sam vrh najljepših na svijetu.

Nematerijalna tradicijska baština utkana je u ninsku svakodnevicu. I oni zajedno žive dajući vašoj sadašnjosti mogućnost romantičnog bijega i posezanja za suvremenim vrijednostima. Ukazanje Gospe od Zečeva s tradicijskim hodočašćem na obližnji otok Zečevo s brodicama i pješčice temelji se na zanimljivoj priči koja vas vremenoplovom vraća na sam početak 16.

A large group of people, mostly men in white robes, are walking down a cobblestone street. In the background, there is a church with a tall bell tower. To the right, there is a large white canopy covering a seating area. The scene appears to be a religious procession or festival in a town square.

Tradicija koja živi svakako je i ninski kaić, drveni brod karakterističnog izgleda čija je izgradnja sačuvana u obiteljskim usmenim

Dolazite li zbog odmora, zabave, rekreacije, u potrazi za zdravljem, u želji da istražujete

*Dokaz peti:
svi se vraćaju!*

I jesmo li što zaboravili?!
Dakako da jesmo, i to s razlogom: Nin i njegova okolica nude vam još mnoga iznenađenja, mnoge ispričane i neispričane priče... zahvaljujući kojima je stekao laskavu titulu europske destinacije izvrsnosti.

**Nin vas s radošću
i srdačnom
dobrodošlicom
očekuje!**

nica from the 1st century. They were both found in the area of Nin and are proof of the town's close connection with the sea.

And there is still so much more to see. From ancient times the remains of the Lower Gates of the city are visible, then there is the largest Roman temple on the eastern side of the Adriatic, a mosaic from the 2nd century, and the remains of residential dwellings in the center of the city. The remains of the walls on the eastern side of the city demonstrate the importance of medieval Nin. Nearby are the Upper Gates of the city and the Church of St. Ambrose (13th century) and the memorial park dedicated to the poet Petar Zoranić

Ninjanin. In the center of the city is the parish church of St. Anselm (6th–18th centuries), once the first cathedral in Croatia, which houses the miraculous statue of Our Lady of Zečevo. Also, take a peek into the Treasury of Sacred Art, *The Gold and Silver of the City of Nin*.

Nin is also known for its monuments to some of its famous people. There is a bronze statue to Bishop Gregory of Nin. According to tradition, if you touch his big toe, your wish will be granted. And it is no wonder that the toe has been worn down by touching because the number of visitors to Nin has grown year by year. The residents of Nin have memorialized a special moment in the life of every country for which they are indebted to Prince Branimir, during whose reign – 7 June 879 – Croatia received its first international recognition, the blessing of Pope John VIII. The city celebrates this date as the Day of Nin, while the country celebrates it as the Day of Croatian Diplomacy.

The second proof:
The rich gifts of nature

Nin is located in the middle of a shallow lagoon. The core of the old city is situated on a small island that is 500 meters in diameter. It is 14 kilometers from Zadar. Nin's sand beaches are unforgettable and they are understandably included among the world's most beautiful.

Nin is also the city of salt, which has been the source of the city's wealth throughout its history. The salt works – which produces salt based on a thousand-year tradition – is open to tourists. Here, right at its source, you will learn everything about the production of salt that is exactly the same as in Roman times. The park of the salt works contains the still-preserved remains of the Roman-era stones gates that let seawater into the basin, but you can also learn about the fascinating world of birds and the unique marine life that has adapted to the specific characteristics of this area. Thanks to the clean environment, the many sunny days, the pleasant breeze and Nin's exceptional geographic position, Nin salt is counted among the highest quality salts in Europe and around the world. And, we know for certain that after this visit, each time you reach for this important addition to every good meal, your thoughts will turn – where else – but to Nin.

Many people come here to improve their health. In the vicinity of the beautiful Kraljičina beach is a site with medicinal mud (peloid) that has been used for more than 40 years to treat rheumatic diseases, deformations of the spine, problems with the locomotive system, infertility, and various skin ailments. The therapies are carried out in a pleasant natural ambience and their effects are enhanced by swimming or bathing in the warm sea. The construction of a modern recreational and tourist will be the next step.

The third proof: Tradition

A non-materialistic traditional heritage has been woven into the patterns of Nin's everyday life. And together they give your present the possibility of a romantic escape and of reaching out for eternal values. The appearance of Our Lady of Zečevo, commemorated with a traditional pilgrimage on foot and by boat to the nearby island of Zečevo, is based on an interesting story that goes back to the beginning of the 16th century. In 1516, the Blessed Virgin Mary appeared to a widowed shepherd woman named Jelena and gave her a message for the people. Our Lady's appearance was confirmed by the tears that appeared on her statue. In revenge for a defeat that they had suffered at Nin, the Turks burned down the church and monastery on the nearby island, killed the priests, and carried off the statue of the Blessed Virgin. According to legend, they threw it

into the sea, but the Blessed Virgin "swam" to Nin. The unique procession that carries the statue of the Blessed Virgin to the island by small boats is an unforgettable event for residents and guests alike. Another living tradition is, of course, the Nin *kaić*, a wooden boat with a special appearance whose construction is handed down within families orally. How does it look? Instead of a description, an invitation: in the harbor of Nin you can see a hundred hand-made boats at anchor. And when you come, do not forget a gastronomic delight – *šokol*. Nin *šokol* is an authentic dried meat product whose quality is based on the meat used and on specialties of the region – mulled wine, spices, salt and the north wind know as the *bura*. The original recipe for *šokol* – to which a special Nin event known as the *šokolijada* is devoted – is closely guarded within families and is only passed on orally. The family secrets in its preparation are not available to you, but the *šokol* itself is. *Bon appetite!*

The fourth proof: A rich touristic offer

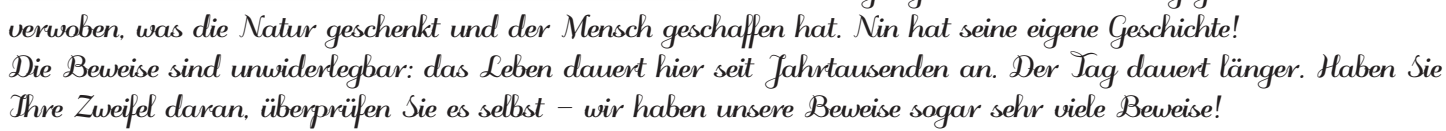

Whether you are coming for vacation, fun, recreation, health, to investigate the rich historical treasures, to travel back in time, or just to enjoy the modern rhythms of the present, you are in the right place! The Zaton Holiday Resort, a beautiful tourist settlement that has won many international and Croatian awards for its quality and the richness of its accommodations and recreational and entertainment attractions is located in Nin. But there are also other types of accommodations – private apartments, apartment hotels, and camps. In the inns, restaurants and pizzerias you will enjoy Mediterranean specialties, authentic tastes and outstanding gastronomy, and you will take home with you special souvenirs and memories from Nin, a tourist center built of beauty, enjoyment and health.

The fifth proof: Everyone comes back

Have we forgotten anything?! Of course we have, and for a reason: Nin and its surrounding area offer you many surprises, many stories told and untold, thanks to which it has acquired the flattering title of the European destination of excellence.

**Nin is waiting for
you with delight
and a hearty
welcome!**

Beweis Nr. 1: ungewöhnlich reiche Schatzkammer

sowie die Überreste von Wohnobjekten im Zentrum der Stadt. Die Überreste der Stadtmauer an der östlichen Seite deuten auf die Bedeutung von Nin im Mittelalter hin. Unweit des oberen Stadtttores und der Kirche des hl. Ambrosius (13. Jh.) wurde ein Denkmal-Park zu Ehren des Dichters Petar Zoranić Ninjanin eingerichtet. Im Zentrum erhebt sich die Pfarrkirche des hl. Anselmus (6 - 18 Jh.), einst die erste Kathedrale der Kroaten, in der die wundertätige Statue der Muttergottes von Zečevu aufbewahrt wird. Werfen Sie auch einen Blick in die Schatzkammer der Sakralkunst *Gold und Silber der Stadt Nin*.

sen Tag feiert Nin den Tag der Stadt Nin, und das Land den Tag der kroatischen Diplomatie. Haben wir alles gesagt, was über die Geschichte und ihre Denkmäler zu sagen ist?! Kaum... die ungewöhnlich reiche Schatzkammer von Nin ist geradezu ideal, um erforscht zu werden! Zahlreiche Denkmäler, viele Geschichten, Legenden und Überlieferungen.

Nin liegt inmitten einer einzigartigen seichten Lagune; der antike Stadtkern befindet sich auf einer kleinen Insel, 500 m im Durchmesser, nur 14 km von Zadar entfernt. Seine unvergesslichen Sandstrände zählen zu den schönsten Stränden weltweit. Nin ist auch als Salzstadt bekannt; Salz war die Quelle des Reichtums der Stadt in ihrer langen Geschichte. Das Salzwerk, das seine Produktion auf der Jahrtausend alten Tradition der Salzproduktion in der Lagune von Nin stützt, ist auch für Touristen geöffnet. Hier, vor Ort, erfahren Sie alles über das Verfahren der Salzgewinnung, das von römischen Zeiten kaum geändert wurde. Aus dieser Zeit werden im Salinepark noch Überreste der steinernen Tore aufbewahrt, durch die Meereswasser in die Becken geleitet wurde, aber auch eine interessante Vogelwelt und eine spezifische Meeresflora und -fauna, die sich den Besonderheiten dieses Raums anzupassen wussten. Das Salz aus Nin zählt wegen der sauberen Umwelt, der vielen Sonnentage, der günstigen Winde und der außerordentlichen geographischen Lage zum besten Salz in Europa und weltweit. Und wir sind fest davon überzeugt, dass Sie, wenn Sie nach diesem Besuch nach dieser für jedes gute Essen so wichtigen Zutat greifen, in Ihren Gedanken entfliehen werden - wohin schon - natürlich nach Nin...

Viele kommen hierher auf der Suche nach Gesundheit. Unweit des wunderschönen Königinnen-Strandes (Kraljičina plaža) liegt ein Strand mit Heilschlamm (Peloid), der schon seit mehr als 40 Jahren erfolgreich in der Behandlung von rheumatischen Krankheiten, Wirbelsäulendeformationen, Störungen des Bewegungsapparats, bei Unfruchtbarkeit von Frauen und zahlreichen Hauterkrankungen eingesetzt wird. Die Therapie wird in einem angenehmen und natürlichen Ambiente durchgeführt, und ihre Auswirkungen werden durch Schwimmen und Baden im warmen Meer zusätzlich verstärkt. Die Errichtung eines modernen touristischen Freizeitentrums ist ein weiterer Schritt...

Beweis Nr. 3: Tradition!

Das nichtmaterielle Traditionserbe ist fester Bestandteil des Alltagslebens in Nin, deren Zusammenleben ein romantisches Entweichen aber auch einen Zugriff auf ewige Werte ermöglicht. Die Erscheinung der Muttergottes von Zečevo mit einer traditionellen Pilgerfahrt zur nahe gelegenen Insel Zečevo, mit Booten und zu Fuß, beruhen auf einer interessanten Geschichte, die uns in die ersten Jahre des 16. Jahrhunderts zurückführt, als sich 1516 die Muttergottes der Hirtin und Witwe Jelena zeigte, ihr eine Botschaft für das Volk mitteilte und die Erscheinung durch die weinende Statue der Muttergottes bescheinigen ließ. Bis zum heutigen Tage noch wird die Erscheinung der Muttergottes gefeiert und gewürdigt. Als Rachezug für ihre Niederlage in Nin haben die Türken auf der nahe gelegenen Insel die Kirche und das Kloster in Brand gesetzt, Mönche umgebracht und die Statue der Muttergottes mitgenommen. Einer Legende zufolge haben

sie die Statue ins Meer geworfen, wonach die Statue wieder nach Nin «zurückgeschwommen» ist. Die einzigartige Prozession, bei der die Statue der Muttergottes in Boten zu der kleinen Insel gebracht wird, ist ein unvergessliches Ereignis, nicht nur für die dortigen Einwohner sondern auch für die Gäste...

Eine Tradition, die weiter lebt, ist auch der so genannte «*ninski kaić*», ein besonderes Holzboot, dessen Bauweise in den mündlichen Familienüberlieferungen lebt. Wie sieht das Boot aus? Statt einer Beschreibung, eine Einladung: im Hafen von Nin können Sie sogar hunderte solcher handgefertigter Boote sehen. Wenn Sie kommen, vergessen Sie die gastronomischen Genüsse nicht; wir empfehlen «*šokol*», ein autochthones Trockenfleischerzeugnis, das seine Qualität neben den Besonderheiten des Klimas auch dem Rotwein, den aromatischen Zusätzen, dem Salz und der Bora verdankt. Das Originalrezept von «*šokol*», dem auch die Veranstaltung «*Ninska šokolijada*» gewidmet ist, wird in den Familien als besonderes Geheimnis gehütet und nur durch mündliche Überlieferung weitergegeben. Zu den Familiengeheimnissen in Bezug auf seine Zubereitung haben Sie keinen Zugang, zu «*šokol*», aber schon. Guten Appetit!

Beweis Nr. 4: abwechslungsreiches touristisches Angebot!

Kommen Sie zum Urlaub, zur Unterhaltung und Entspannung, auf der Suche nach Gesundheit, mit dem Wunsch, die reiche historische Schatzkammer zu erforschen, oder um mit der Zeitmaschine in die Vergangenheit zu reisen, oder einfach nur, um die modernen Rhythmen des Gegenwart zu genießen...

Hier sind Sie an der richtigen Stelle! In Nin befindet sich das Zaton Holiday Resort, eine wunderschöne touristische Anlage, die sich durch ihre vorzügliche Qualität und ihr reichhaltiges Angebot von Unterkunftskapazitäten, Freizeit- und Unterhaltungsmöglichkeiten zahlreiche internationale und kroatische Auszeichnungen verdiente. Zu erwähnen sind aber noch andere Unterkunftsmöglichkeiten – private Appartements, Aparthotels, Campingplätze... In den typisch dalmatinischen Lokalen (*konoba*), Restaurants, Pizzerien, Gasthäusern... können Sie Mittelmeerspezialitäten genießen, originelle Geschmäcker und eine vorzügliche Gastronomie kosten und mit besonderen Andenken und Erinnerungen aus Nin, dem touristischen Zentrum, aufgebaut auf Naturschönheiten, Genuss und Gesundheit, nach Hause kehren.

Beweis Nr. 5: Alle kommen wieder!

Und, haben wir etwas vergessen?! Natürlich, und dafür gibt es einen guten Grund: Nin und seine Umgebung halten noch viele Überraschungen für Sie bereit, zahlreiche schon bekannte aber auch unbekannte Geschichten... die der Stadt zum ehrenhaften Titel eines herausragenden europäischen Reiseziels verholfen haben.

Nin freut sich auf Sie und heißt Sie herzlich willkommen!

Molti vengono qui alla ricerca della salute. Vicino alla bellissima spiaggia detta Spiaggia della Regina, si trova il fango salutare (peloide) che già da 40 anni viene usato con successo nella cura delle malattie reumatiche, deformazioni della schiena, problemi dell'apparato locomotore, infertilità femminile e diversi tipi di malattie dermatologiche. La terapia si svolge in un ambiente naturale e gradevole, ed i suoi effetti aumentano con il bagno ed il nuoto nel mare caldo. La costruzione del moderno centro ricreativo-turistico, è solo un passo avanti...

Il patrimonio della tradizione non materiale è intessuto nella quotidianità di Nona. Questo legame dona alla vostra quotidianità sia la possibilità di una fuga romantica nel passato, sia il gusto dei valori universali. L'apparizione della Madonna (Gospa od Zečeva) con il pellegrinaggio tradizionale alla vicina isola Zečevo con le barche o a piedi, si basa su un racconto interessante che vi porta all'inizio del XVI secolo. Nel 1516 la Madonna apparve alla pastora vedova Jelena, le diede un messaggio per il popolo, e l'apparizione fu confermata dalle lacrime della statua della Madonna. Da quel momento fino ad oggi si venera l'apparizione della Madonna. I Turchi, in segno di vendetta per la sconfitta a Nona, bruciarono sull'isolet-

Una tradizione che continua a vivere è senza

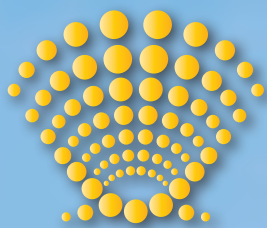

dubbio la barca “kaič” di Nona, una barca di legno di una forma caratteristica. Il metodo della sua costruzione si è conservato nella tradizione orale delle famiglie locali. Com'è fatta? Invece di descriverla, vi invitiamo a vederla: nel porto di Nona potete vedere un centinaio di barche costruite a mano. Ma quando venite, non dimenticate il piacere gastronomico – assaggiate lo “šokol”. Lo Šokol di Nona è un prodotto autoctono di salumeria la cui qualità è dovuta non solo alla carne ma anche alle particolarità del territorio – il vino rosso cotto, le spezie, il sale e la bora. La ricetta originale dello šokol – a cui è dedicata la manifestazione “Ninska šokolijada” – è co-

*Quinta prova:
tornano tutti!*

Abbiamo dimenticato qualcosa?! Ma certo che sì, e non per caso: Nona ed i suoi dintorni vi offrono tantissime altre sorprese, molte storie raccontate e non... grazie alle quali si è meritata il titolo lusinghevole di destinazione europea per eccellenza.

MEDICINAL MUD (PELOID) IN NIN

Eco Natural Treatment Centre - Summer Clinic in the Open on the Sea – Thalassotherapy along Queen's Beach

Peloid site – medicinal mud is located in the centre of Nin's Lagoon close to the longest sandy beach in Croatia, well known Queen's Beach. The site is located in a natural oasis of shallow, long and sandy coasts, far from industrial zones and isolated from direct traffic and main road routes. Even the old Romans recognized therapeutic benefits of Nin's peloid on human health. Unearthed flues – round bricks used in baths for hot air circulation, and today exhibited in the Museum of Nin's Antiquities – are indicating its use in the Roman time. On the site of Punte the statue of Liburnian divinity Venus Ansoctica from the 1st century was discovered. She represented a goddess of fertility and procreation so this might indicate that baths used to be in that area during the Prehistory and Roman time. Among Nin's rich natural resources one of the most valuable is medicinal mud (liman, peloid) that's been healing and helping for decades. Slightly before the 1st World War peloid experts from Medical University of Vienna analysed Nin's medicinal mud and decided about constructing a health centre, unfortunately cancelled by war.

Since 1960 the Academy of Medical Sciences in Zagreb registered Nin as thalassotherapy health centre and site of the sea peloid in the Northern Dalmatia with summer clinic in the open for peloid therapy. Department of physical medicine and rehabilitation of School of Medicine of University of Zagreb conducted researches of peloid sites in Nin's Lagoon couple of times (in 1968 and 1988). Nin is the biggest site of medicinal mud in Croatia, 120,000 m³ in size. Exceptionally high quantities of peloid and specific micro-climate of Nin's Lagoon enabled starting of organised therapy on the site back in 1965 and they continue also nowadays. **Application and Direction for Use** - For almost 45 years medical staffs of Zadar's General Hospital organise and supervise the mud treatments for various disorders. Rehabilitation and mud wrapping is conducted in the Health centre of Nin during summer months: July and August, and occasionally in June and September. From the beginning of the clinic in the open archived database shows that more than 15,000 patients went through efficient therapy with Nin's medicinal mud.

Always fresh and high quality mud is extracted from natural environment and applied on the body. It consists of humus and minerals produced through century old natural process of dissolving of different plants by mixing fresh and salt water in the shallow lagoon. The therapy starts in the morning hours with group exercises after which peloid is applied on a body. Then, in a pleasant natural ambient in the open, patients are sunbathing on a sandy beach for about 30 minutes, until the mud on a body dries. In the end the mud is rinsed and followed by swimming in the warm sea that prolongs the therapy. For increased effect the therapy is repeated twice a day. Peloid therapy lasts minimum 10 and up to 20 days. The effects of peloid are indicated through physical, mechanical and chemical reactions. **Before usage of the medicinal mud it is recommended to consult medical staff that will guide you through the mud application, time for rinsing, multiple usages during the day and duration of the therapy.** Patients are coming to the organised Summer Clinic in the open on the site of Nin's mud with prepared illness documentation, and specialised care referral from general practitioner or physiatrist. Medical experts open a folder for every patient in which they write medical treatment course and do medical exam if necessary.

Indications for Application of Medicinal Mud (peloid):

1. Functional disorders and illnesses of musculoskeletal system, rheumatic infections, metabolic bone diseases, rheumatism, different spine deformations and other problems that are consequence of musculoskeletal system defects.
2. Skin problems
3. Gynaecology – it is good for gynaecology disorders and in treating women infertility
4. Aesthetic medicine – for improving skin tonus and minimising cellulite.

Contraindications: Peloid therapy should be avoid by people with pressure, heart and cardiovascular system problems. It is mandatory to consult a doctor before start and during the therapy.

Medicinal mud – peloid – is used mainly for health reasons but also for fun or photography.
